

# STEM Communication Training and Facilitation

Want your research to stand out and reach a wider audience? Strong communication skills are the key!

I support everyone from new PhD students preparing their first conference talks to senior academics and STEM Professionals looking to impress, by offering training to maximise their potential.

Masterclasses, consultation and bespoke facilitation are available.

Dr Katherine Holmes

I am an experienced maths and science communicator, delivering talks to hundreds at conferences and ticketed venues. As a trainer, events facilitator, public speaker, and improvised drama coach, I provide training in confidently communicating STEM research and inspiring collaboration. I achieved an applied mathematics PhD from Imperial College London and use my academic background to provide expert training.
